# The scale of online child sexual abuse

# 291,273

reports the IWF confirmed in 2024

They contained, linked to or advertised child sexual abuse imagery.

## Every intervention is an opportunity to offer a safer next step

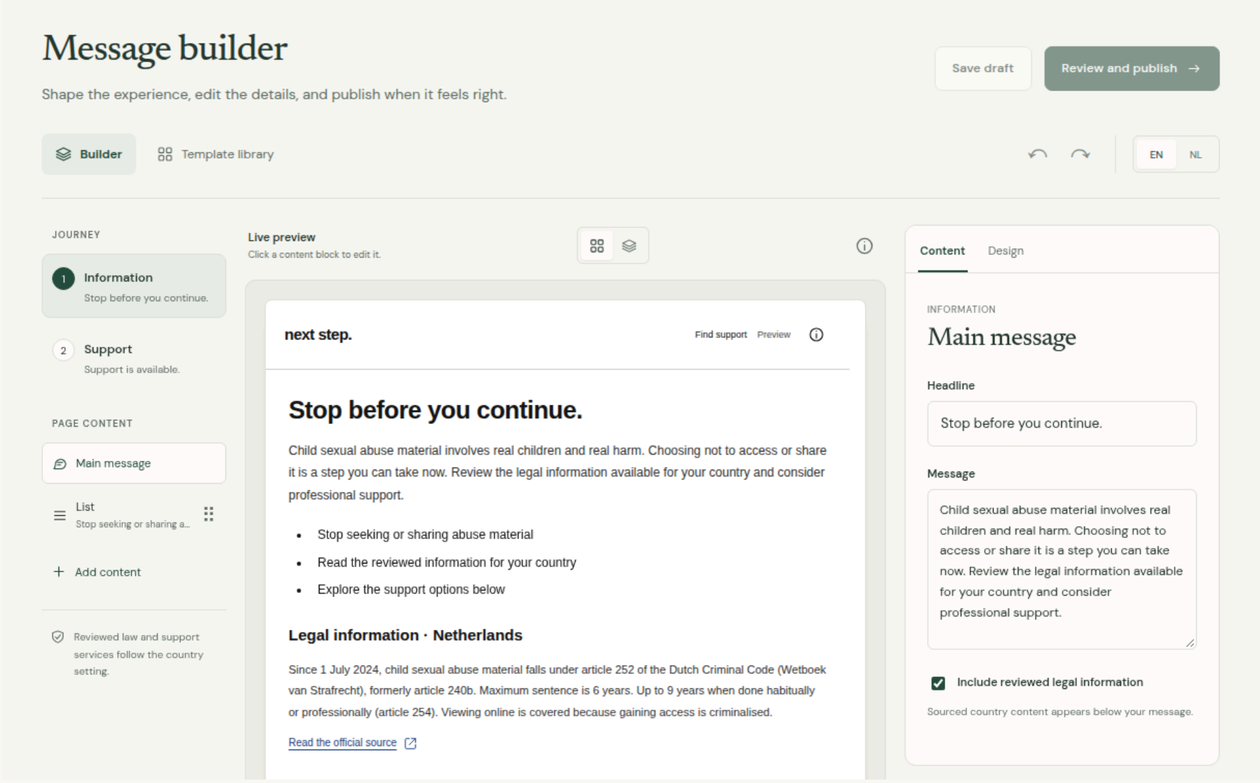

Internet Watch Foundation, Annual Data & Insights Report 2024

Reports represent URLs or direct child reporting services. This is not a count of victims or global prevalence.

# We built Next Step

A deployable intervention toolkit with a visual message builder.

Browser React WordPress Discord

Working product: the moderator message builder

Host platforms supply detection. Next Step delivers the intervention.

# From warning displays to help seeking

**2.8M**

reThink chatbot displays

**490**

recorded support-site click-throughs

Our hypothesis puts reflection before education and support.

We compare experiences to learn what people engage with.

IWF / Lucy Faithfull Foundation, reThink chatbot evaluation, March 2022 to August 2023

These figures describe reThink, not Next Step. Our intervention sequence remains a design hypothesis.

# Platforms can deploy it
# Researchers can improve it

## Install across platforms

For your website, forum or Discord community

## Adapt the experience

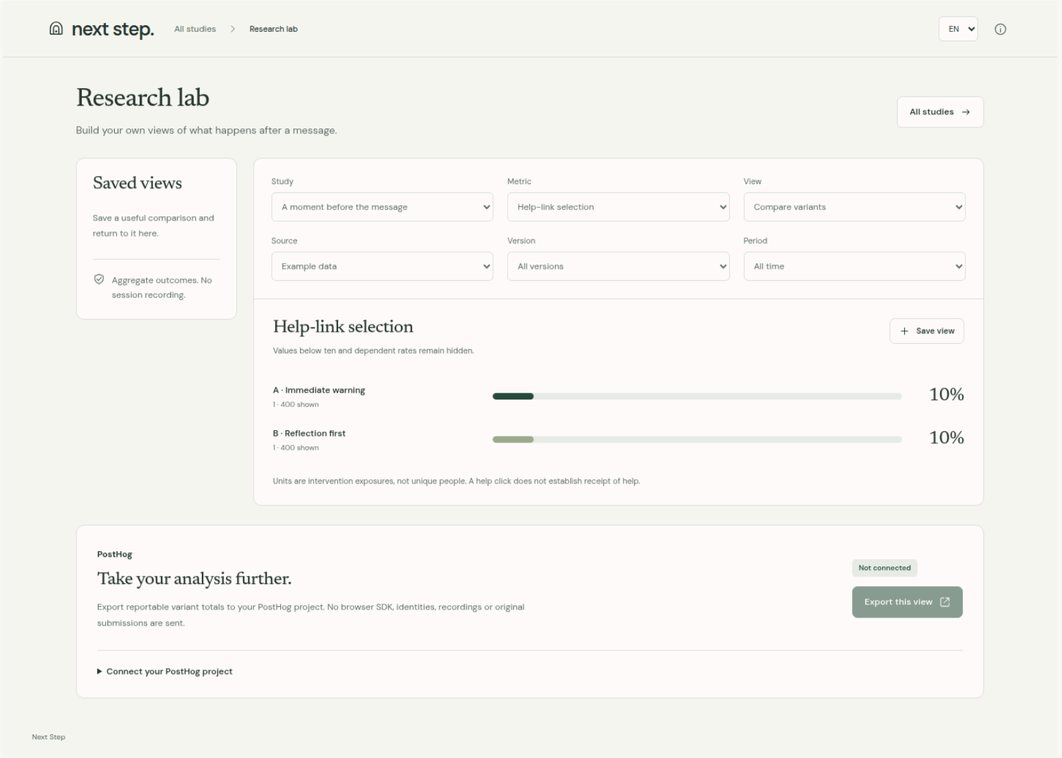

6 distinct designs with editable, localized content

## Compare with consent

Opt-in studies, even random assignment and aggregate results

## Built for privacy

No raw inputs or visitor profiles. Counts below 10 stay hidden.

Working product: the independent research lab

Research screen contains synthetic demonstration data. Next Step has not yet established prevention efficacy.
